

Chemical and Food Engineering Day

Tuesday 16th April 2019

This is a great opportunity to learn about what Chemical Engineers and Food Engineers do. You will get hands-on experience working in our labs and use some of our equipment in the Food Pilot Plant.

This is a free event during the school holidays for Year 11-13 high school students. It would suit students studying maths and science who are interested to learn where these subjects could take them.

WHAT YOU WILL GET TO DO:

- Learn about how we make cheese, the different properties it has and how we make stretchy mozzarella
- Whip up your own custom designed moisturiser
- Enter the Food Pilot plant and use the equipment to make ice cream.

WHEN 16th April 2019

WHERE Massey University
Palmerston North

COST Free Event
